Correct. To convert from radians to degrees, multiply the radian measure by $\dfrac{180°}{\pi}$ and simplify:

$$-\frac{11\pi}{6} = -\frac{11\pi}{6} \cdot \frac{180°}{\pi} = -\frac{11}{1} \cdot \frac{180°}{6} =$$

$$-11 \cdot 30° = -330°$$
