

Correct. Multiplication by 10^{23} has the same effect as moving the decimal point to the right 23 places. Therefore:

$$1.673 \cdot 10^{23} = 1.673000000000000000000000 \cdot 10^{23} =$$

$$1673000000000000000000000$$
