You may have rounded 54.90 to 50 and 64.95 to 60 (with an estimate of 10 for the tie). While these estimates are close, a more accurate estimate is provided by rounding the first amount to 55 and the second to 65. This would give you an estimated total of $55 + 65 + 10 = 130$. The correct answer is $130.
