

You added  $6\frac{2}{3}$  to  $-18\frac{3}{4}$  instead of adding  $-6\frac{2}{3}$  to  $-18\frac{3}{4}$ . First add  $\left|-18\frac{3}{4}\right|$  and  $\left|-6\frac{2}{3}\right|$ . Both addends in the problem are negative, so their sum is negative. The correct answer is  $-25\frac{5}{12}$ .
