

Multiply the polynomial by -1 : $(-1)(-15d^2 + 8d - 7)$

Distribute -1 to each term: $(-1)(-15d^2) + (-1)(8d) + (-1)(-7)$

Multiply each coefficient by -1 : $15d^2 + (-8d) + 7$

Rewrite addition of a negative term as subtraction: $15d^2 - 8d + 7$
