

You may have made a mistake with a sign. Remember that a negative times a positive is negative.

$$2(3) + 3(-1) = 3 \text{ or } 6 - 3 = 3 \text{ or } 3 = 3$$

The statement is true, so the ordered pair  $(3, -1)$  is a solution to the equation.

The correct answer is  $4x = 8y + 4$ .
