

You may have made a mistake in subtraction. Remember that subtracting is the same as adding the opposite and the sum will have the same sign as the addend with the greater absolute value.

$$-1 = 3 - 4 \text{ or } -1 = 3 + (-4) \text{ or } -1 = -1$$

The statement is true, so the ordered pair $(3, -1)$ is a solution to the equation.

The correct answer is $4x = 8y + 4$.
