

Correct. The year 2010 is represented by the point on the horizontal axis midway between 2009 and 2011. Starting there and moving up to the line graph, you will reach a point that is just above the line midway between 8,000 and 10,000. Because the height is just over 9,000, the value of the car is about \$9,000.
