Correct. The circumference of a circle is given by the formula $C = 2\pi r$, with $\pi \approx \dfrac{22}{7}$. In this circle, $r = 14$, so:

$$C = 2\pi \cdot 14 = \pi \cdot 28 \approx \frac{22}{7} \cdot 28 = 88$$

The circumference of the circle is about 88 meters.
