Correct. The sum of the three angles is 180° . So the measure of the third angle is the solution to:

$$56^{\circ} + 63^{\circ} + x^{\circ} = 180^{\circ} \text{ or } 119^{\circ} + x^{\circ} = 180^{\circ}$$

So
$$x^{\circ} = 180^{\circ} - 119^{\circ} = 61^{\circ}$$
.

The third angle measures 61 degrees.
